

SUMMER CAMP 2019

JUNE 17 - AUG 23

STEAM CAMPS

YOUTH ENTERING 2ND - 5TH GRADE

Camp includes our traditional fun and diverse programming with engaging STEAM activities to keep bodies and minds active during the summer.

Week 1 June 17th - 21st Formula for Fun

Ready, set, go! Grab your gloves and goggles and run to the Club's lab for this week's wacky experiments. This week we kick-off summer with a fun-packed week of wacky experiments. Campers will mix and measure crazy creations that will fizz, foam and ooze as we explore the scientific method in this hands-on week of outrageously fun science.

Week 2 June 24th - 28th The Big 5

Campers will have fun perceiving science in 5 different ways. Through fun experiments and games, we will explore how each of the five senses work to help us understand the world around us. Through sight, sound, smell, taste and touch we will get up close and personal with science!

Week 3 July 1st - 3rd Magic Beans

Once upon a summer week, in a land of fairy tales and magical powers imaginations come to life. In this week full of storybook adventures, campers will embark on a magical journey to spark their imagination as they build their own fictional worlds. Every day we will sprinkle in some imagination, a handful of magic and let fiction fly!

Week 4 July 8th - 12th Crazy Contraptions

Calling all inventors! This week campers will become their very own inventors as they work in teams to design and create Rube Goldberg style mechanisms to complete fun challenges. Through the hands-on exploration of simple machines like pulleys, levers, gears and screws, campers will learn how amazing inventions work! Their imagination is the only limit in this fun week of ingenuity!

Week 5 July 15th - 19th Take Flight

Ready for take off! This week campers take to the skies as they explore hot air balloons, parachutes, gliders, planes, helicopters and rockets. Campers will follow the footsteps of da Vinci and the Wright Brother's by creating and testing their own extraordinary flying machines then launching them out into the great unknown. Let fun take flight!

Week 6 July 22rd - 26th LEGO Bot Builders

A fun hands-on introduction to programming and robotics. Campers will build robots brick by brick and program them to complete engaging challenges that will test our mini scientist's resourcefulness and creativity. From bowling to obstacle courses we will program exponential fun into this week with our tiny bots!

Week 7 July 29th - Aug 2nd Wild Side

Campers will become safari journalists and ecologists as they learn how ecosystems around the world function and about the diverse flora and fauna which live in them. No rock will be left unturned as they traverse around the globe to report on a variety of regions from the freezing arctic tundra to the scorching desert!

Week 8 Aug 5th - 9th Passports

Join us in an adventure as we travel to lands both near and far. Campers will explore fun around the world as they experience music, dance, games, art, and culture from different global locales while collecting stamps in their passports and creating souvenirs along the way! Pack your bags, we got tickets to fun.

Week 9 Aug 12th - 16th Color Coding

Calling all artists and robot wranglers! Campers will work in teams to create amazing worlds for their Ozobots to explore and complete challenges. With the stroke of their markers campers will begin to create code for their Ozobots to follow. Lets see how much fun they can get their mini bots into!

Week 10 Aug 19th - 23rd Endless Summer

End the summer with a bang and the best! During each week of fun-packed camp activities all summer, campers will vote for their personal favorites. During this final week, votes will be tallied and the winning activities will be enjoyed one last time. Summer may be ending, but the fun times will keep on rolling. Vote for fun!
